

DUET 400 DVD/CD Recorder Printer

with patented RadialPrint™ Technology

What is a DUET DVD/CD Recorder Printer?

The DUET 400 is the smallest complete disc publishing product on the market today. It includes the recorder, printer, recording software from Sonic, and SureThing label software from MicroVision.

The DUET 400 is all you need to get started in disc publishing. This small, robust device includes record and label software for a complete solution. For more information please visit www.region4.com.au.

Who would benefit most from a DUET 400?

People who work in photography, videography, music and data storage need a way to archive their data at minimal expense. In addition, any business that creates a DVD or CD for promotional use, or as a service to their clientele will appreciate how easily the DUET 400 slips into their current environment.

Why should I own a DUET 400?

The DUET 400 is small and mighty. It takes up the space of a phone on your desk and is designed for commercial-grade performance.

For less than \$1,600 AUD you can own an integrated disc publishing system.

The DUET 400 does not include expensive robotics. This design is perfect for those who create small batches of unique content.

The DUET 400 offers a wide range of media options: white matte for cost-sensitive needs, silvered media that sparkles, and water-resistant for a durable finish.
